

## PETER PAN SYNDROM – Henry Sargeant

### technical rider:

Unless otherwise communicated I need a technician for running the light during the show.

Set Up duration: circa 3 hours

Set Down duration: circa 3 Stunden

I use **pyrotechnics**. One spark-fountain (BAM PT 1 0785)

I use a small smoke machine. If the venue has a small smoke machine available, we can save some transport.

It should be possible to hang some strings for various objects (see light plan)

I need five electrical sockets on stage.

There is one trolley, that moves around during the performance, that requires one long electrical connection.

**We need sight lines to the floor.**

### music:

I need a PA for the microphone and cinch connection from a sampler.

### lamps:

We need various lamps (see light plan)

1 flood light(1000W)

about 9 PC (1000W) (or similar)

1-3 profiles (650W) (pointing at the centre)

it's possible to adapt this light plan to suit the venue if necessary

### stage:

minimum width 6m

minimum depth 8m

minimum height 4m
